1:30pm: Managing Ships in the 2020s

How should shipmanagers position themselves as service providers in the 2020s? A sector that is growing fast needs to be listening carefully to what its clients want – the Maritime CEO Forum serves as the perfect sounding board to assess how managers must transform to stay relevant.

Ship finance showed its first uptick in more than a decade in 2021. However, given the current state of the global economy, lenders have returned to their cautious stance – what is a good ship finance project in 2022, what checks the box – a must-attend for anyone wanting to raise capital in shipping.

The Maritime CEO Forum will attempt to identify some genuine market guidance to the dry bulk sector, giving attendees an idea of where rates are headed in the coming months, and the longer term big picture, looking at supply and demand fundamentals with a high calibre panel.
